COMPLEMENTARY COMPETENCE IN BACHELOR'S DEGREE PROGRAMMES

Elective studies compiled into modules

Elective studies are a part of completing a university of applied sciences degree. Complementary modules make it possible to deepen or extend your knowledge.

From autumn 2014, elective studies will be offered in modules. The modules being offered at Laurea are all listed and described in each campus's own complementary competence curricula.

The modules comprise competence areas. A module typically includes at least two study units, but alternatively competence can also be developed in projects. Credits can also be gained through recognition of prior learning or demonstrations.

Complementary competence modules are also well-suited for further education for those students, who have completed a degree. Graduates can enrol in them as students of the Open University of Applied Sciences.

Modules further competency in a subject area

The scope of a module is 15 - 30 credits. Complementary competence modules support individual study paths and competence. Complementary competence modules that are compatible with the student's professional goals can include in his/her degree. The compatibility of the elective studies with the degree will be subject to prior agreement with the teacher tutor.

Learning is made relevant to workplace development and the student's personal goals. The learning outcomes specified for the modules build on future workplace needs and Laurea's focus areas.

Completion of studies

Campus-specific curricula describe what studies a unit has planned to offer over the course of a degree programme. Not all courses are held every year, rather a new list of available courses is planned and published each academic year according to demand.

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits. The study unit implementation plans specify the objectives, content and implementation form of the studies. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case.

The modules have been designed so that they can mainly be completed in the course of one or two semesters. Study units can be implemented either in Finnish or in English. The language of the implementation is decided for each semester and is visible in the study unit offer.

In order for a student to further their competency, we recommend that the student selects entire modules, but it is also possible for a student to select individual study units (courses) from within modules.

Flexible Possibilities for Completing Attainments and Specialising

Any studies in an institution of higher education can be counted as advanced competency. In addition to complementary competence studies presented in the curriculum the student can for example

- select complementary competence studies offered on Laurea's different campuses
- select a core competence module in another degree programme as their advance competency
- include in the degree studies selected from the offer of the FUAS Federation, or HAMK University of Applied Sciences and Lahti university of Applied Sciences

Completion of studies

Campus-specific curricula describe what studies a unit has planned to offer over the course of a degree programme. Not all courses are held every year, rather a new list of available courses is planned and published each academic year according to demand.

In order for a student to further their competency, we recommend that the student selects entire modules, but it is also possible for a student to select individual study units (courses) from within modules.

Curriculum Development

The offering of the complementary modules is constantly under development to match the requirements of the working life and thus the offering may change during the studies. Up to date plans on the available advanced competency modules will be published each academic year.

R020 OTHER COMPLEMENTARY COMPETENCES, 15 cr

Description:

The aim of the studies offered in this module is to develop student's basic knowledge and skills. The studies will give basic abilities for the student to be able to manage on his/her studies in his/her field of studies. The student will conduct the appropriate studies from this module according to the initial tests or his/her needs. After completing the studies the student will have gained basic knowledge and skills to develop his/her skills to apply these competences.

Also other studies which develop professional skills can be offered in this module. Studies completed elsewhere can always be placed in this module.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Hyvinkää, sote: Terhi Hautaviita

Lohja, sote: Anu Elorinne

Porvoo: Erja Annola

Tikkurila: Marja Vellonen

R0074 Basic Studies in Mathematics, 5 cr

The student is able to:

The student is able to

- solve mathematical problems at a level required in the UAS studies.

G8307 Enjoy your studies, 5 cr

01469 Student Tutor Activities, 5 cr

The student is able to:

Student is able to

- understand the objectives and operating methods of Laurea and his or her own degree programme
- plan new operating methods to enhance the commitment of new students
- perceive the content of his or her own culture
- provide new students from different cultures with information on the learning environment and culture of the Laurea community
- market Laurea University of Applied Sciences and the opportunities for study offered by Laurea
- apply communication and marketing skills required in the marketing of Laurea
- act as a mentor for students in need of support
- understand the significance of effective tutoring activities for the promotion of well-being in the community

Contents of the study unit:

- Campus-specific meetings according to an agreed-upon schedule and the planning of tutoring

- Training events for tutors organised by Laurea
- Creating their own competence profile in the Kyvyt.fi service and acting as a 'reflection tutor' in the context of the online service
- Tutoring activities related to entrance examinations in the spring and in the autumn
- Providing new students with an introduction to Laurea at the start of each term in September and January
- Providing guidance to international and exchange students throughout the term
- The planning of the Freshers' Event and the Pre-Freshers' Event Party
- Support measures for new students related to themes addressed in the study unit on career planning in accordance with the agreed upon division of labour
- Participation in campus events at the student's own campus

Study unit description:

- The students learn how to evaluate tutoring from the viewpoint of their own campus and the educational responsibilities that exist in that campus
- They know how to instruct new students in the Laurea operating culture
- The students are familiar with the systems currently in use
- They know how to create a competence portfolio for themselves and are able to support new students in the creation of a competence portfolio at the kyvyt.fi service.
- They are familiar with the learning environments of their campus and have the capacity to represent the campus in different events where necessary
- The students are familiar with working methods in the area of career planning and, in cooperation with a teacher tutor, are able to support new students in matters related to career planning
- They have the capacity to act as an active promoter of the work community and student well-being

Previous studies:

A student acting as a student tutor must be a member of the student union of Laurea University of Applied Sciences.

R015 LANGUAGE SKILLS AND INTERNATIONAL COMPETENCE, 15 cr

Description:

The aim of the study units in the module is to develop language skills and international competence needed at work. After completing the module the student has developed his/her ability to work in multicultural working environments.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Tikkurila: Camilla Kåla

R0082 Basic Communication in English, 5 cr

The student is able to:

The student

- knows the basics of English grammar
- knows the basics of written and spoken communication
- is able to use study-related and work-related vocabulary
- is able to enhance language skills by making use of a variety of study methods

R0098 Basic Communication in Swedish , 5 cr

The student is able to:

The student is able to:

- know the basics of Swedish grammar
- use study-related and work-related vocabulary
- know the basics of written and spoken communication
- enhance his/her language skills by making use of a variety of study methods

R0089 Language and Culture Tandem, 5 cr

The student is able to:

The Student is able to

- improve his/her target language skills, especially oral skills
- make observations and get familiar with target (foreign) culture and society
- expand his/her general cultural competence

R0083 Basics of Spanish 1 , 5 cr

The student is able to:

The student is able to:

- understand the basic structures and vocabulary of Spanish
- communicate in Spanish in simple situations
- write simple and targeted texts
- understand some cultural characteristics of the Spanish-speaking world

G107 CUSTOMER RELATIONSHIPS AND MARKETING, 15 cr

Description:

The objective of the module is that the student masters marketing and sales planning as well as the development of customer relationship management as a whole. He/she knows how to develop a customer relationship management process for different segments, profitable and loyal customers as a goal.

The student is able to develop strategic marketing mix solutions for different segments. He/she uses a variety of marketing communications and sales management solutions in the international business environment. The student is able to develop company's customer relationships and take the advantage of the data of the customer information system to gain a profitable customer capital.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Johanna Lunkka and Eeva Miettinen

Leppävaara: Anne Martola

B052 ECONOMIC GOVERNANCE, 15 cr**Description:**

The aim of the module is that students will understand the principles of accounting and financial statements, and the main finance and taxation legislation related to business.

Students will learn how the economy is closely connected to a company's operational procedures improve their cost accounting skills as well as increasing their knowledge of how a company improves its overall business profitability. Students will be able to analyse businesses with the help of financial statements, key numbers and various calculations, and to make use of this information in the company's development and decision-making.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Mika Hentunen

G108 LAUREA STARTUP, 15 cr**Description:**

The objective of the module is that the student is able to evaluate and develop his/her entrepreneurial skills, is able to assess his/her business idea and draw up a business plan on the basis of his/her business idea. The goal is also that he is familiar with entrepreneurial social obligations and opportunities.

If a student is interested in starting his/her own business, the objective is that the student is able to do so in practice and knows how to prepare for early-stage entrepreneurial challenges. Student is able to analyze and to utilise financial and operational performance information in his/her business.

Students can complete 15–30 credits in the module with the aim of developing their entrepreneurial skills or their own company.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi and Leppävaara: Marjo Ruuti

Hyvinkää: Maija Huhta

G103 PROMOTING WELLBEING, 30 cr

Description:

The objective of the module is for the student to be able to evaluate and develop physiotherapy as a part of his/her client's wellbeing.

After completing the module the student is able to extensively apply different physiotherapy assessment and exercise methods. The student is able to evaluate and develop his/her own competence, as well as services from a multidisciplinary perspective in the client's different operating environments. The student is able to foresee future challenges to wellbeing and create solutions.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Johanna Stepanoff ja Irma Karhu

G8289 Goal Attainment Scaling (GAS) and ICF as a Part of Rehabilitation, 5 cr

The student is able to:

The student is able to

- use the GAS method to describe the objectives for and evaluation of rehabilitation
- apply International Classification of Functioning, Disability and Health (ICF) terminology in physiotherapy and rehabilitation
- analyse and evaluate the usefulness and applicability of GAS and ICF in demonstrating effectiveness

G8290 Supporting Mental Functions, 5 cr

The student is able to:

The student is able to

- describe the basics of psychophysical physiotherapy
- evaluate a client's resources and motivation with psychophysical physiotherapy assessment methods
- support and promote the client's health and functional ability in multidisciplinary operating environments
- evaluate the effectiveness of physiotherapy and create new practices

G8291 Nutrition as Support for Wellbeing, 5 cr

The student is able to:

The student is able to

- describe the basic functions of the digestive system and its regulation and the effect of physical activity on nutrition
- describe and recognise the significance of nutrition for the wellbeing of people in different ages
- evaluate the client's body composition and support dietary habits that promote a client's wellbeing

- design approaches that take physical activity and nutrition into account and promote the client's overall wellbeing.

G8292 Applied Physical Activity, 5 cr

The student is able to:

The student is able to

- describe the significance of the disorders or defects of the cardiovascular system and respiratory system with regard to a person's wellbeing and functioning
- evaluate and improve the client's functioning with methods of applied physical activity
- evaluate and develop assistive technology appropriate for the client's needs and supporting activity and participation

G8293 Promoting Health, 5 cr

The student is able to:

The student is able to

- conceptualise the national and global threats to health and wellbeing
- develop environments that will promote health and functional ability
- evaluate and promote the population's health and functional ability

G8294 Ensuring Thriving at Work, 5 cr

The student is able to:

The student is able to

- recognise and describe the different risks occurring in working environments
- evaluate the health and wellbeing of employees at work places
- promote the thriving at work in different situations in working life
- develop work and operating environments on the basis of assessments.

G105 REHABILITATION NETWORKS, 15 cr

Description:

The objective of this module is to develop the student's expertise in international rehabilitation networking.

After completing the module the student is able to act in national and international rehabilitation networks. The student is able to evaluate the challenges and develop the effectiveness of physiotherapy, as well as develop the operations in the field of physiotherapy networks.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Johanna Ieskelä

G8298 National and Global Rehabilitation Challenges and Effectiveness, 5 cr

The student is able to:

The student is able to

- recognise and describe national and global rehabilitation challenges.
- apply the principles of sustainable development in his/her own work
- evaluate the effectiveness of rehabilitation and develop operations in a multidisciplinary and multicultural operating environment

Previous studies:

Studies in physiotherapy.

G8304 Optional Work Placement, 10 cr

The student is able to:

The student is able to

- critically evaluate his/her own professional actions and actively develop himself/herself, his/her own work and field of expertise by using investigative and developing approaches
- use his/her economical, administrative and management skills in his/her own physiotherapy work
- act as an agent with real influence in multiprofessional and multicultural networks

G110 LEADERSHIP AND MANAGEMENT, 15 cr

Description:

After completion of the module, the student is able to lead and develop an organization, its functions and personnel according to a business strategy. During the module, the managerial and project leadership skills of the student will develop.

The ability of the student to lead himself/herself, different individuals, teams and organizations will develop. The student is familiar with the rights and responsibilities that labour laws require of an employer. After completion of the module, the student is able to promote welfare at work. She/he is able to function in both national and international environment.

Student can study 15-30 credits in this module.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Moduulia ei enää tarjota

R005 EARLY CHILDHOOD EDUCATION COMPETENCE, 30 cr

Description:

In this module, the students develop their specific and multi-disciplinary pedagogical competence and expertise in

early childhood education. The students build up competence that supports a child's individual and communal growth, development and learning. The students become experts of education, care and teaching in the area of early childhood education. After completing this module, the students may take on a leading role in a team of educators and act as an educational partner in multiprofessional networks. The studies contained in this module are part of the study path leading to the competence of a kindergarten teacher.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Virpi Lund

Tikkurila: Maarit Koskinen

Hyvinkää: Maire Antikainen

R0093 Diversity and Special Nature of Early Childhood Education, 10 cr**The student is able to:**

The student is able to:

- assess a child's individual needs for growth, development and learning
- work in a goal-oriented manner and as required by the child's needs for special support and development
- work for a child in cooperation and in a family-oriented way in multiprofessional networks
- apply his/her competence in early childhood education in work, respecting the strengths of different children, families, cultures and views of education

R0094 Pedagogical Competence in Early Childhood Education, 10 cr**The student is able to:**

The student is able to:

- analyse the value base, aims and underpinning knowledge of early childhood education
- take a child's characteristic ways of acting into account in education
- recognize the significance of inclusion, communality and dialogical interaction in a child's growth, development and learning
- create preconditions for an educational partnership and cooperation

R0095 Competence in Guiding Early Childhood Education Activities, 10 cr**The student is able to:**

The student is able to:

- plan, guide and evaluate pedagogical activities and operational environments that meet the needs of children and groups of children
- apply functional and creative methods in education
- reflect upon an educator's actions and his/her own view of education

V078 CHILD PROTECTION - YOUNG PEOPLE AND FAMILIES , 15 cr

Description:

Students completing this module will develop their knowledge and competencies in working with children, young people, and families from the perspective of strengthening client participation. Students will be capable of working as a social worker in a psycho-social setting. Furthermore, students will become familiar with the working methods, procedures, and processes involved in child protection work and be capable of engaging with young people and families in various professional settings. The students will also be able to reflect on their own knowledge and understanding of the work in this area.

The module is worth between 15 and 30 ECTS.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Mirva Alapoikela ja Tuula Saarnio

Tikkurila: Hanna Väättäjä

G8299 Work with Challenging Children, 5 cr**The student is able to:**

The student is able to

- assess a child's or youth's special needs
- work in institutional care that support children

G8300 Child Welfare Services in Open Care, 5 cr**The student is able to:**

The student is able to

- assess what type of support the child and family require
- work in accordance with the Child Welfare Act and principles of child welfare
- use the work methods in open care in an appropriate way

G8301 Work with Young People, 5 cr**The student is able to:**

The student is able to

- assess a young person's needs
- support young people with different methods, including the work in Internet

G111 MULTIDISCIPLINARY CUSTOMER WORK COMPETENCE IN THE SOCIAL SERVICES AND HEALTHCARE FIELD, 15 cr**Description:**

The core purpose of the module is for students to gain an understanding of human growth and development and of life's different stages.

After completing the module, the student is able to support the creation of an interactive relationship between people of different ages. The student is able to improve a customer's potential to develop his/her own personality and skills. The student is able to utilise various multidisciplinary methods when guiding activities according to a customer's needs.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: (hoitotyö) Anna-Kaisa Hankaniemi, (sosionomi) Annika Kultavirta

G8286 Different Stages of Human Life, 5 cr**The student is able to:**

The student is able to

- recognise and describe developmental entities and opportunities in different phases of a person's life
- evaluate the course of his/her client's life and give guidance

G8287 Similar, Different and Various Types of Opportunities, 5 cr**The student is able to:**

The student is able to

- recognise the specific challenges in a person's growth and development and know the service systems in use for these
- support his/her clients' different ways of learning and acting
- guide rehabilitative operations according to the client's needs
- encounter and resolve situations where challenging behaviour is exhibited

G8288 Interaction Skills in the world of Children, Youths and Adults, 5 cr**The student is able to:**

The student is able to

- support the building of interaction relationship with a baby, child, youth or adult
- give guidance on developing an interactive relationship in client work
- analyse interaction skills and situations in client work

G104 ENTREPRENEURIAL ACTIONS AND E-SERVICES, 15 cr**Description:**

The objective of this module is to develop the student's multidisciplinary leadership and entrepreneurial skills.

After completing the module the student will be able to apply the basics of leadership and management in his/her own professional work. The student will be able to evaluate the services and inclusive service processes in his/her field. The student is able to transform and renew practices used by the work community in an entrepreneurial and

innovative way in a changing operating environment.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.

Responsible persons:

Otaniemi: Mirva Alapoikela ja Merja Wirman

G8295 eWellbeing Services and Their Development, 5 cr

The student is able to:

The student is able to

- describe and conceptualise existing eWellbeing Services.
- evaluate the accessibility and feasibility of eWellbeing Services
- innovate and design new eWellbeing Services.

G8296 Management and Leadership, 5 cr

The student is able to:

The student is able to

- describe different models and theories of leadership
- recognise the challenges of leadership and management work
- evaluate and develop one's own actions as a member of the work community and as someone in a managerial position
- evaluate the work community and wellbeing in the workplace
- apply labour legislation and collective agreements

G8297 Entrepreneurship:, 5 cr

The student is able to:

The student is able to

- describe the objectives for development of services from the perspective of professional life and the region in question
- recognise and develop client-oriented, sustainable and economical solutions for services as a part of the operations of the innovation environment
- design business operations for a physiotherapy cooperative or enterprise

V070 PROJECT MANAGEMENT, 15 cr

Description:

In this module, the students develop their project management skills.

After completing the module, the students understand the significance of projects in developing business operations. They are able to plan and conceptualise projects. They recognize risks associated with projects. They are able to sell projects and obtain the resources needed to implement them. The students are able to implement, manage and

supervise projects. They are able to plan and evaluate projects.

Learning process:

The competences described in the module can be developed either by participating in study units or working in projects. Please note that in some education forms projects are the primary way of gathering credits.

In the projects you participate in the development work of domestic or international businesses and communities and in project work. The language used in the project can be either Finnish or English. Projects can also focus on developing the student's own business. The topic of the project and the competences developed by participating in it will be clarified when the project is added to the study offer. The scope of the project will be agreed on in each case. The competences generated in the projects can partly be included in the learning outcomes of some other module(s) and thus the credits can be divided between several modules.
